- JavaScript

PROFESSIONAL EXPERIENCE

MICROSOFT, Redmond, WA   **2015-Present Senior Software Engineer**
As a technical lead on a Membership team building a globally distributed and high scale front-end experience that puts users in control over their data. In pursuit of Microsoft GDPR compliance I led a team of 3 developers that built consumer facing privacy dashboard which allowed users to see, export, and delete their data coming from all Microsoft products. Accountable for quality and ensuring all consumer facing scenarios worked end to end irrespective of the source of user requests. Worked with many cross discipline teams such as legal, marketing, engineering, recruiting, HR, etc.

Previously, as a member of a Storefronts team built globally distributed, high scale web experience for one-stop-shop experience for everything Microsoft and its partners sell.

MICROSOFT, Bellevue, WA   **2014-2015 Software Engineer II**
Member of a Commerce Platform team. Built next generation rating engine for the modern commerce platform on .NET stack with C#.

DISNEY WORLD PARKS & RESORTS, Orlando, FL **2014-2014 Software Engineer (Contract)**
From the ground up developed a workforce management Single Page ASP.NET MVC application.

SEAWORLD, Orlando, FL **2013-2014 Software Engineer (Contract)**

- Configured automated build and deployment system leveraging Team Foundation Server for over 70 web applications and web services.

• Designed and developed an internal WPF tool (implements Onion architecture) for importing production issues from Jira system into Team Foundation Server.

GOOGLE, Celebration, FL   **2013-2013 Software Engineer (post- Channel Intelligence acquisition)**
Designed and implemented new features for front and back end software running on .NET technology stack with a SQL and MySQL backend.

• Implemented new ASP.NET WebForms and MVC portal features and optimized few existing ones which significantly improved operators' productivity and client satisfaction.
• Automated new client provisioning within Real-Time and Availability system based on ASP.NET Webforms, WCF and Windows Services.

CHANNEL INTELLIGENCE, Celebration, FL   **2012-2013 Senior Software Engineer (pre-Google acquisition)**
An e-commerce provider.
• Architected and implemented a Windows Service following MVP pattern which eliminated manual Url validation performed by operators.
• Developed new features for a v1 ASP.NET MVC portal that simplified the process of configuring Where-To-Buy client configuration.

FISERV, Lake Mary, FL   **2008-2012 Senior Software Engineer,** 2010 – 2012
A leading global provider of information management and electronic commerce systems.
Lead professional services team of developers to customize base CRM product by developing new and modifying existing features to satisfy customer needs.

• Technical implementations lead on the Aperio CRM team managing 5-10 developers. Aperio leverages ASP.NET (C#), Web services, XML, XSLT, Windows Identity Foundation, and SQL server technologies.
• Successfully lead the effort of developing Single-Sign-On feature in Aperio by leveraging Windows Identity Foundation.

• Built a prototype Windows Phone 7 and Silverlight tablet applications that leverage Aperio web services for new bank account opening on AS400 system.

Software Engineer, 2008-2010

• Designed a defect tracking process for Country Wide bank project which helped the team get more organized and reduce the number of defects in the system.
• Created a SharePoint portal for knowledge repository and reference which is used by multiple Fiserv product development teams across the globe.

SYMANTEC, Lake Mary, FL   **2006-2007** www.symantec.com/backupexec/

Software Engineer, 2006-2007
As a member of Backup Exec engine team developed new features and enhanced existing ones using C++.

- Implemented System State backup support for Windows Vista before its launch.
- Enhanced Distributed File System replication and namespace protection.
- Built a Windows Service for hosting Volume Shadow Copy writers.

PUBLIC SAFETY AND TECHNOLOGY CENTER, Orlando, FL   **2004-2006 Lead Project Developer,** 2004-2006
Technology solution provider to Florida police agencies
Lead the effort of building a distributed data sharing applications for police departments in Florida.

NEVALON TECHNOLOGIES, Raleigh, NC   **2003-2004**
Provides clients with professional services for all phases of the software development lifecycle including project management and IT outsourcing.

Mobile Applications Developer, 2003-2004
Develop mobile and web applications on Microsoft technology stack.
